

Pontprennau Primary School

Exciting washrooms for a brand new school

A brand new two-form entry primary school has been built in Pontprennau, Cardiff, with capacity for 420 pupils ranging from three to eleven years old. The much needed school will play a huge part in the local community and Amwell Systems were delighted to be a part of the project.

Pontprennau Primary needed a washroom company that could provide a long-lasting, durable system and cater for all the practical issues that come when dealing with children on a daily basis.

The primary school chose our fantastic Acorn range especially designed for younger pupils providing gently rounded doors, sweeping partitions and the all important anti-finger trap hinges.

For the older children our Splash range was specified, designed to withstand high traffic it is both water and impact resistant. Both systems are constructed from Solid Grade Laminate, a durable hard-wearing material that can endure consistent use and meet all the demands that modern school washrooms face.

With 36 colours in the Acorn and Splash ranges, Pontprennau Primary had a wide selection to choose from enabling them to provide bright, fun and engaging washrooms for their pupils.

"The new washrooms at Pontprennau Primary are bright, modern and functional. Amwell Systems delivered high quality, sturdy products in a great range of colours perfect for primary schools - we will definitely use them again".
