Splash SGL

Shebbear College is one of the worlds oldest Methodist schools located in the rural surroundings of North Devon. Dating back to 1841 and set in an outstanding 85 acres, the school caters for girls and boys ages three to eighteen.

Here at Amwell Systems we had the pleasure of working closely alongside Shebbear College during their renovation project providing high quality washrooms for their new Sixth-Form Centre and other areas across the school. We were delighted to work with such a fantastic school and took pleasure in understanding the requirements of both the staff and students.

A product built to last

Shebbear College needed reliable, hard-wearing products that also looked the part, they chose our Splash cubicles and Solid Surface Washtroughs that do exactly that. The brand new washroom facilities provide a modern and welcoming feel, with the sleek design offering an adult environment for the sixth-formers.

Stunning, Stylish Splash

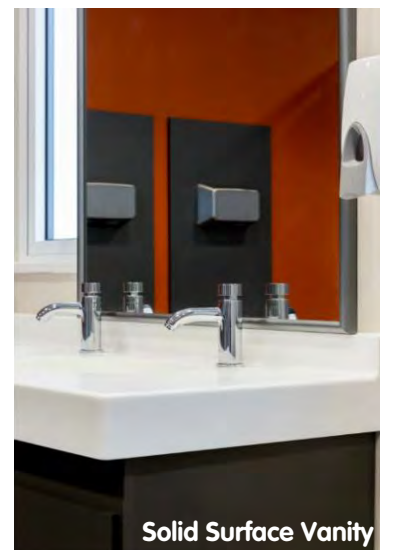

Our stunning Splash range is ideal for school environments being both water and vandal resistant. Manufactured from robust SGL, it features through-fixed polished aluminium hardware for maximum durability, with a stylish, sleek aluminium headrail to complete the modern look. Splash ticks all the boxes for a top quality performance and appearance, fitting in perfectly with the new sixth-form centre.

Our Splash cubicles are available in 36 laminate colours, Shebbear College decided to go with our Diamond and Charcoal that matched their school colours, keeping consistency throughout the school.

Along with our Splash cubicles, Shebbear also chose our stunning Solid Surface Washtroughs in Hailstone to complete their washrooms. Our Solid Surface range is now available in 15 fabulous colours, including bright & bold options!
